Objective

Dedicated **Computer and Software Engineering** student with a strong passion for **Cyber Security**. I aim to leverage my solid foundation in software development and system architecture to transition into the cybersecurity domain. My goal is to apply my technical skills in building secure systems and protecting digital assets within a forward-thinking professional environment

Experience

2019–2020
Proprietor & Graphic Designer • Self-Employed • Nawalagoda, Matara

2019–2026
Web development • Self-Employed • Nawalagoda, Matara

- ✓ Successfully managed a T-shirt design business, utilizing self-taught expertise in Adobe Photoshop and Illustrator to create high-quality visual content.
- ✓ Gained practical experience in **digital entrepreneurship** through dropshipping and the resale of Windows product keys, focusing on customer service and technical support.
- ✓ Developed strong manual labor and teamwork skills through hands-on experience in **welding and masonry**, working alongside family members.

Education

Rahula collage , Matara
- G.C.E. Advanced Level (A/L)

IMS Campus
- Certificate in Computing

ICBT Campus (Pending)

Communication

I possess strong interpersonal skills and the ability to explain technical concepts clearly. My experience in managing online businesses and working in team based environments (welding/masonry) has taught me how to communicate effectively with diverse groups of people. I am fluent in both Sinhala and English allowing for smooth collaboration in a professional setting.

Leadership

As a self motivated entrepreneur. I have taken the lead in managing my own business ventures from scratch. Whether it was coordinating design projects or managing sales, I have demonstrated the ability to take initiative, solve problems independently and maintain a high level of responsibility and work ethic.
